Dissatisfied with the Well River Water.

To the Editors of the Appeal:

Now that the excitement of the Presidential election is over, and ended as desired by most of us, I think it is time we were paying some attention to local matters, particularly to our water supply. We pay twelve months water rent and can use the water three or four months in the year. This morning you might take a pint of red clay and mix it with a quart of water and it would give you the consistency of the water we are using. If the Water Company is not able to do better by us, why not let the Taxing-District declare their charter forfeited, pay them a reasonable price for what they have done and give us good water (not mud). If it gets any worse we will not have safe drainage.
